FCM 5530 Leg Extension / Curl Rehab

Dual function exercise machine for quadriceps and hamstring muscles. The machine has two separate levers, allowing for exercising both legs individually. Range limiters and isometric testing included as standard. SmartCard system with touch screen interface.

Technical specifications

Features	Natural Transmission resistance mechanism. Safe, enclosed transmission system. Easy Access handgrips. Adjustable back support. Leg straps. Safety belt.
Rehabilitation Features	Range limiters to determine start and finish position of lever arm. Adjustable lever arm. Isometric testing (requires HUR Performance Recorder 9200).
SmartCard Features	Personal exercise data is stored on the SmartCard during every workout. Equipment and exercise information visible on display. SmartCard software includes a secured database for individuals, groups, exercises and workout programs, and workout history. Offers the opportunity to create your own workout program templates and save them. Also includes statistical information on usage percentage and an up-to-date list of gym's active customers.
